

mechanical test housing

key solution
cooperation with customers
for design + manufacture

- a result of more than 10 years' experience
- available with integrated manipulator
- fully integrated docking and board locking
- best lead times assured by production sites in Germany + China

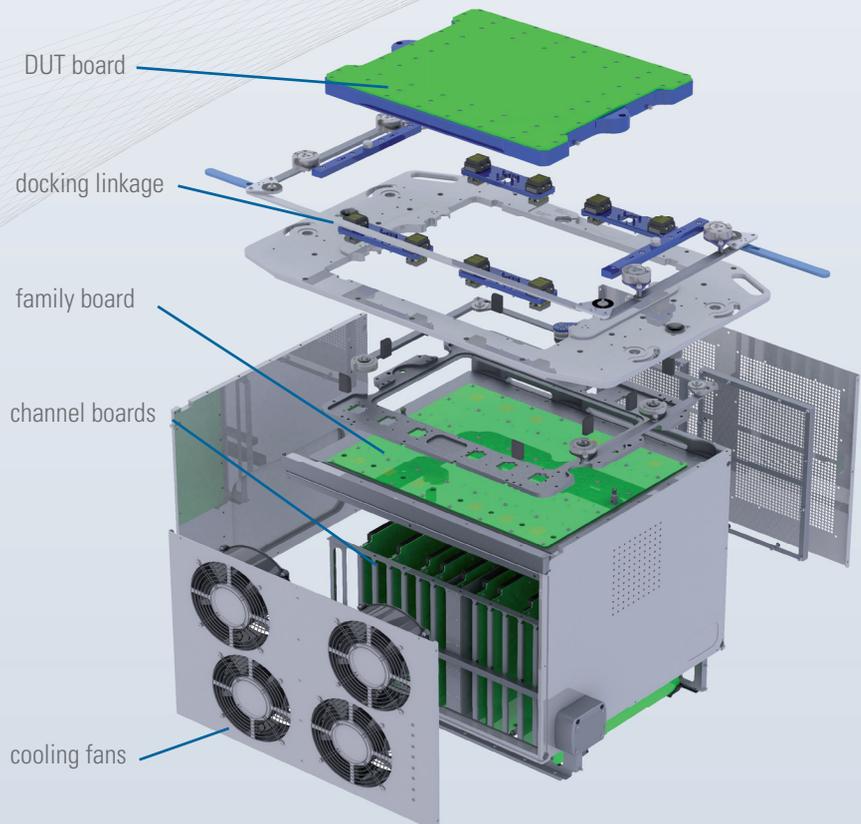

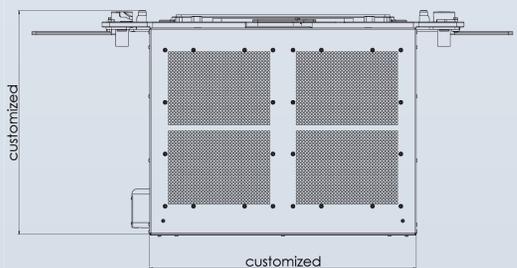

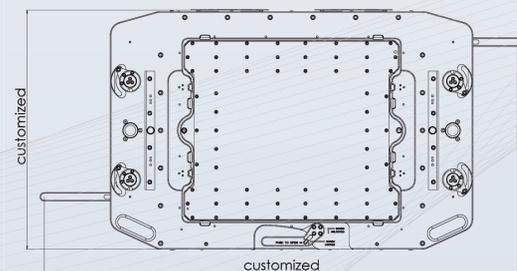

key features

- test housing mechanics design as per customer specifications
- suitable for individual and high-volume production
- standard and customized dimensions
- no limitation in size and electrical power capacities
- fully integrated docking
- quick and easy locking and unlocking process for board change
- large application space – load board
- optional number of channel boards as per customer specifications
- family board / DUT board connection achieved by high-end double-ended spring probes – 50 Ohm
- high-end cooling fans
- facilitated adaptation with all available manipulator solutions
- docking design in compliance with customer internal docking standards/dimensions
- docking force as per customer specifications
- center of gravity fully compensated
